STUDENT ASSISTANT – LABORATORY RESPONSIBLE

Job advertisement

24.03.2026, Herlev

We are searching for our next team member and want to keep an open mind about the personal profile.

We are searching for a person with:

- **passion for finding enzyme solutions** making value of food production side streams.
- **passion for HPLC.**
- **passion for laboratory equipment.**
- **handy person with passion for hands-on laboratory work and technical problem-solving.**
- **passion for method development and continuous improvement.**
- interest in using **AI solutions.**
- **Language and cultural skills**
- Interest in learning and **contribute broadly and positively** to a small but passionate team.

The job includes the following tasks:

1. **HPLC competences**
 - a) Perform routine maintenance and calibration of HPLC-SEC equipment.
 - b) Prepare samples for HPLC analysis in accordance with specific analytical requirements.
 - c) Use the proprietary HPLC software to perform sample analysis and conduct data analysis.
 - d) Stay up to date with current technologies and developments relevant to future system upgrades.
2. Ensure **proper laboratory housekeeping**, including cleaning, organisation, disposal, and labelling of raw materials, chemicals, and equipment in line with LEAN laboratory practices.
3. **Maintain and calibrate laboratory equipment** in accordance with supplier guidelines and internal procedures.
4. **Conduct application trials and laboratory analyses** in accordance with safety regulations, Good Laboratory Practice (GLP), and internal procedures.
5. **Arrange external analyses** of samples when necessary.
6. **Receive and dispatch raw materials and samples** to external stakeholders.
7. **Develop new and updated laboratory procedures** where required.
8. **Ensure compliance with relevant regulations** governing the handling of chemicals and food materials.
